

Building Affordability into your dreams

Project 425 Energy Efficiency Group
C/O Mark Snyder
12900 Brookprinter Place #200
PoWay Ca. 92064

We wanted to say a very special thank you to the entire group that came together to supply the solar and energy efficiency products for the Extreme Home Makeover house in Pinon, Az.. The Yazzie family was truly a family in need and still are burdened with a lack of income. Your thoughtfulness helped them to achieve a dream come true, not only a beautiful home but a net zero home. Each one of you that participated did a fantastic job and our expectations were not only met but completely exceeded. The amount of solar contributed to the Yazzie home certainly meets the definition of "extreme". Not only did you contribute your impressive talents and products to this build, you made the entire show. Without your help the home and the story would have paled in comparison. The giving of yourselves and the no quit attitude each of you has is something we would like to commend each of you for. Little did we know when we first took on this challenge that we would result with such an amazing product. The home is truly something to behold and each one of you should be extremely prideful of the family that you helped and the home that you produced.

We are a production homebuilder in the Phoenix market building between 600 and 800 homes a year, seldom had we contemplated the impact that your industry can provide. Our eyes have been opened, we are thankful for the education we received from you before, during and after this build and we are actively pursuing incorporating your products and technology into the homes we will build in the future. Thank you so much for your participation in the project.

Sincerely,

Steve Sasso
